

WOOD AND WOOD/ALUMINIUM ENTRANCE DOORS

Custom wood windows and doors -

- ☐ Inles d.d. is a manufacturer of windows and doors with more than 75 years of experience.
- ☐ The legacy of Inles quality is built on hundreds of years of tradition in crafting woods.
- ☐ Inles products are known for quality and durability all over Europe. We are also known under the trade mark ISARHOLZ.
- ☐ Carefully selected materials and a technologically advanced manufacturing facility guarantee outstanding products for safety, durability, design and comfort.

☐ Inles offers only the highest quality windows and doors. We are recognized throughout the world. Most of our products we sell in the EU market and the markets of Asia, Africa, north and south America.

☐ We offer a variety of materials: wood, vinyl, aluminum or any combination of wood/aluminium, pvc/aluminium that will enhance the appearance and quality of your home.

☐ With Inles you can choose the materials to satisfy your taste.

*- Quality and advanced technology
for all architectural requirements.*

Wood and wood/alu doors

WOOD & WOOD/ALU DOORS

Entrance doors are your visitors' first contact with your home and people often say they are a mirror of your home. All Inles entrance doors are produced and designed with exceptional attention to detail. They will keep your home warm and protect you from unwanted visitors.

WOOD DOORS (68/94)

ALPINE ALTHOLZ

ALPINE ALTHOLZ

ALPINE entrance doors combine modern design with the timeless elegance of natural wood.

The exterior is treated with aged wooden panels in a grayish or clear tone, giving the doors an authentic rustic touch.

The interior is made of spruce, larch, or oak wood. The surface can be only primed, and a full range of opaque color shades is available, along with a limited selection of translucent stains from our color chart.

WOOD DOORS (68)

TREND LINE

TREND LINE

The base of the door, frame and wing is available in any colors and tree species: spruce, pine, larch, oak and meranti.

On the outer side the wings are made of solid battens aligned with the door frame to crate a 3D look of larch or oak wood. The surface of the battens is only possible as oiled.

WOOD

- ☐ You can choose from the following species of wood: spruce, pine, larch, oak and meranti.
- ☐ The wood meets the RAL quality requirements according to EN 942
- ☐ The moisture content of the wood is controlled and amounts to 13 +/- 2%.
- ☐ Wood is stored in regulated air humidity warehouse, which prevents cracking and other defects related to inadequate moisture content in the wood.

WOOD PROFILES

- ☐ Wood frame and leaf profiles with a thickness of 68, 80 mm.
- ☐ The profiles are three layers of wood joined together using waterresistant D4 adhesive according to the EN 204 and EN 14257 standards.
- ☐ The mullion of the door leaves of the CLASSIC range include aluminium and steel stabilisers to prevent the leaf bending.

HARDWARE

- ☐ Quality three-dimensional adjustable standard Baka PROTECT 4010 3D FD hinges (HH 68) and concealed hinges Tectus TE 540 3D (HH80).
- ☐ 3 or 5-point locking of the leaf.
- ☐ Various options for opening: outside opening, a fingerprint system, electrical opening etc.

GLAZING

- ☐ You can choose from a variety of thermal and acoustic insulated and safety glass.
- ☐ A wide selection of ornaments and vitrages according to your wishes.
- ☐ Finishing the glass with various foils, glass accessories, sandblasting etc.

SURFACE TREATMENT

- ☐ You will surely find a colour shade to your taste from our wide range of various coatings.
- ☐ Optional two-coloured version.

NOTE:

▼ **OILED SURFACE** On the surface treated with oil we make no guarantees. The products like this requires at least 2x annual coating with a suitable oil, which you can buy from us.

✳ **COLORS RF/K 15, RF/K 16, RF/K 17, RF/K 26 and RK 1, RK 2, RK 4**

This shade strongly emphasizes the wood grain and is therefore more sensitive to possible color deviations, different hues and staining, which can occur due to different wood structures, restored resin bales and other manufacturing-related characteristics. Wood is a natural product, so after such a surface treatment with a more pigmented primer, the different absorption of the wood due to its unique shape and structure creates a playful combination of colours. This does not mean a reduction in the quality of the natural product wood nor that such colour differences can be a reason for a complaint about wood products.
