Alu strips
HD Golden Eiche FS

Handle 316 838

This series is characterized by models featuring 3D aluminum strips on the exterior of the door leaf. The strips create a distinctive 3D effect and give the door an exclusive, modern appearance. They are available in seven wood finishes and can be harmoniously integrated into various design concepts.

The series is available in the aluminum system ADS 95AK.SI with a double-sided, leaf-overlapping design, as well as in the timber/aluminum system 80/78.

SYSTEM ADS.SI

- ☐ Frame profile is made from 75 or 95 mm thick aluminium and has straight or curved lines.
- ☐ Casement profile is made from 85 and 75 mm thick aluminium.
- ☐ Frame and casement profiles include a core thermal insulation weatherstrip that improves their thermal performance.
- ☐ Hard PUR foam core is clad in aluminium and features superior thermal insulation performance.
- ☐ In variants where the casements are covered on both sides and have no glazing, the thermal transmittance of the doors is $U_d = 0.84 \text{ W/m}^2\text{K}$, while in aluminium entrance doors with cladding on one side the U_d value is $1.2 \text{ W/m}^2\text{K}$.

HARDWARE

- ☐ Quality three-dimensional adjustable hinges.
- ☐ 3 or 5-point locking of the leaf.
- ☐ Various options for opening: outside opening, a fingerprint system, electrical opening etc.

GLAZING

- ☐ You can choose from a variety of thermal and acoustic insulation and safety glass.
- ☐ A wide selection of ornaments and vitrages according to your wishes.
- ☐ Finishing the glass with various foils, glass accessories, sandblasting etc.

SURFACE TREATMENT

- ☐ Quality and environmentally friendly powder coating surfaces.
- ☐ You can choose from a wide range of standard colours, metallic colours, imitation wood dekors and colours from RAL colour chart.

RC2 – we are happy to provide you with detailed advice on this.

In addition to the high quality standard of aluminium front door, these are equipped with a 5-point lock as standard locking.

You can safety upgrade the door with certified RC1 safety levels and RC2 and equip them for a simpler and more practical use.

RC2 VERSION

1 SAFETY BOLT

2 SAFETY GLASS P4A

3 WING LIFT LIMITER

4 SECURITY PROFILE CYLINDER WITH ANTI-DRILL PROTECTION

5 SAFETY KNOB

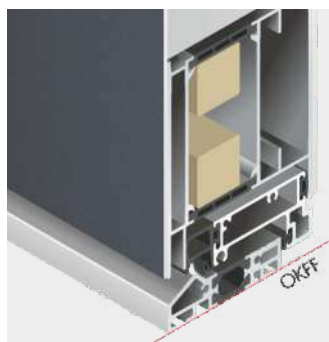

3 THREE-DIMENSIONAL
ADJUSTABLE HINGES

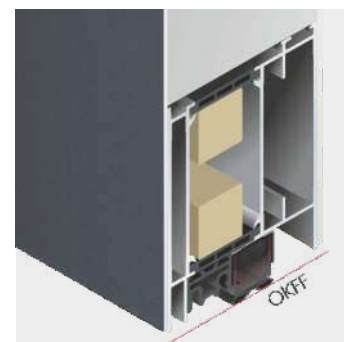

Up to a door height of 2150 mm
- 3 hinges are installed, over dim. 2151 mm
- 4 hinges are installed (standard)

4 THRESHOLD

FP5

SECURITY DOOR LOCKS

ATVE 5
5-point lock
 - stainless steel
 with bolts and
 swing hooks

**basic security
 serial**

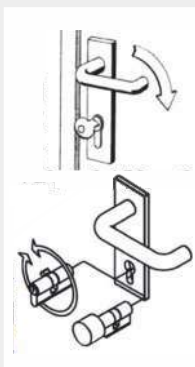

*mechanical multipoint
 locking system*

*5-point security
 through one main
 latch, 2 bolts, and
 2 swing hooks*

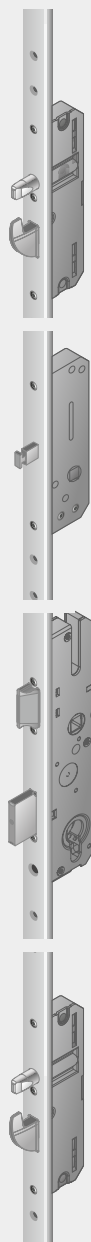

ATVK 5
**5-point lock with
 comfort function**
 - stainless steel
 with bolts and
 swing hooks

- Mechanical opening of the door via handle always possible (convenience opening)
- A free-wheeling cylinder or a thumb turn cylinder is required
- Only possible in combination, except pull handle – inside handle (outside handle not possible)

Comfort function
 = quick opening from
 the inside via the handle

ATVS 5
5-point security lock
 - stainless steel
 with bolts, swing hooks
 and door gap restrictor

The spring-loaded security latch ensures that the door only opens a crack, preventing any unwanted guest from squeezing between the door and frame.

From the inside, the security latch lock can be easily operated via a thumb turn; from the outside, it is operated with a key via the main lock.

ELECTRIC OPENER

CONCEALED DOOR HINGES

Opening inwards
 - 100° opening angle

Opening outwards
 system ADS 75B.SI
 - 100° opening angle

ATVE A
5-point security lock
AVTOMATIC,
MECHANICAL

Automatic multipoint locking system with integrated self-adjustment

- 1 Always reliably secure. To ensure the door is reliably locked at all times, the automatic release latch is integrated.
- 2 Day release: Leave the house without a key. Practical for everyday situations in which you want to leave the building briefly without a key: simply deactivate the automatic function using the day-release slider and release the main lock latch on the frame part.

ATVE A-M
5-point security lock
AVTOMATIC,
MECHANICAL
with motorized function,
including power supply unit

- Locking elements can be mechanically locked
- Unlocking via intercom system, biometrics, etc. (the main lock bolt must not be double-locked)

ATVS 5EA
5-point lock Genius

Stainless steel, including power supply unit, with electromechanical drive, free-wheeling profile cylinder with anti-drill protection and emergency function, including 6 keys.

Attention: Only cylinders marked FZG may be used!

As soon as the door is closed, automatic locking is activated in night mode by the motor (approx. 3 seconds). All available locking elements are extended.

The door can be unlocked manually using the cylinder key or automatically via an external access control system.

When the door is fully locked, it is also possible to retract all locking elements from the inside via the handle and open the door quickly in this way.

PROFILE CYLINDER

Profile cylinder with emergency and danger function and 6 keys (standard)

Profile cylinder with anti-drill protection and 6 keys

Free-wheeling profile cylinder with anti-drill protection and emergency function, including 6 keys

Access control system (ATVE A-M, ATVS 5EA GENIUS)
